Part III DETAILED ACTION

Claims 1-3 are currently pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1-2 drawn to biopolymer identifying method.
- II. Claim 3 is drawn to information recording medium.

The inventions listed as Groups do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and II do not share a special technical feature because, for Group II, the information about a program is non-functional description information that does not impart patentability of an "information recording medium" per se. Therefore, Group I is not considered to be a special technical feature.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
